

Kritika Sharma

AI & ML undergraduate with experience in building machine learning applications and interactive web projects.

LinkedIn: www.linkedin.com/in/kritika-sharma-198a28303
GitHub: <https://github.com/kritikasharma3342>

Email: kritikasharma40406@gmail.com
Mobile: +91-9872927465

SKILLS

• Languages:	C++, Python, Java, C
• Web Technologies:	HTML, CSS, JavaScript
• Frameworks & Tools:	FastAPI, Scikit-learn, Docker
• API Tools:	Postman, Thunder Client
• Databases:	MySQL, MongoDB
• Soft Skills:	Problem-Solving, Teamwork, Adaptability, Communication

PROJECTS

- **AR-World : AI-Powered 3D Catalog:**
About: Built a prototype web app that converts natural language input into interactive 3D objects and allows users to place them in real-world environments using augmented reality.
Tech: JavaScript, Gemini 1.5 Flash, model-viewer, Web APIs
Key Contribution: Connected AI understanding with user experience, handled API integration, and designed an interactive product-style interface.
- **Customer Sentiment Analysis System:**
About: Developed a web-based application to classify user sentiment using machine learning models and display real-time predictions through a simple interface.
Tech: Python, FastAPI, Docker, Scikit-learn (SVM, Logistic Regression), HTML
Key Contribution: Built and deployed ML models, compared model performance, and implemented end-to-end workflow from backend to UI.
- **Query Prioritization System:**
About: Created a machine learning pipeline to classify and prioritize university queries based on text input and structured features like department and response time.
Tech: Python, NumPy, Pandas, TensorFlow
Key Contribution: Applied preprocessing and model training techniques to build a functional classification system.
- **Laptop Harmonium (Web Audio Project):**
About: Built a browser-based virtual harmonium that plays Indian classical notes using keyboard, mouse, and motion-based interactions.
Tech: HTML, CSS, Web Audio API, JavaScript
Key Contribution: Designed an interactive user experience, implemented multiple input methods, and experimented with creative front-end development.

CERTIFICATIONS

- Introduction to Generative AI - Google Cloud Skill Boost.
- Introduction to Large Language Models - Google Cloud Skill Boost.
- Introduction to Data Concepts - IBM SkillsBuild.

LEADERSHIP & ACTIVITIES

- **Vice President - The Invincibles (Student Organization)**
Led and coordinated team activities, contributing to event planning and execution.
Assisted in managing internal communication and team collaboration.
- **Social Media Manager - The Invincibles**
Managed and grew presence on platforms like LinkedIn and Instagram.
- **Student Coordinator – Campus Connect Committee (SCA):**
Managed social media content including posts, reels, and short videos for student engagement.
Contributed to content planning and execution for initiatives and events.

EDUCATION

• Lovely Professional University <i>Bachelor of Computer Application – Specialization in AI & ML; CGPA: 9.03</i>	Punjab, India August 2024 - 2027
• Bhartiya Vidya Mandir School <i>Intermediate; Percentage: 87.40%</i>	Ludhiana, Punjab April 2023 - March 2024
